

Have a  
great  
summer!

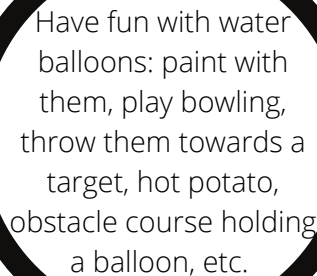

Every time you complete one of our "challenges", colour in a flower petal. Have fun stimulating your child's language and motor abilities all summer long!

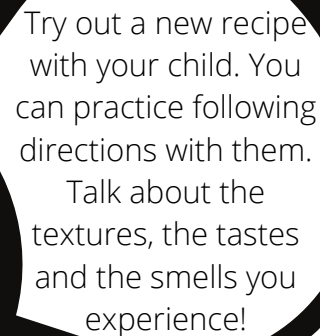

Build a fort in the living room and read stories with your child.

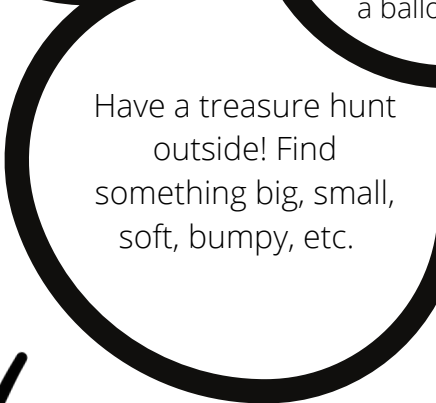

Explore a new park and have fun creating an obstacle course! Climb, jump, run and try out some animal walks.

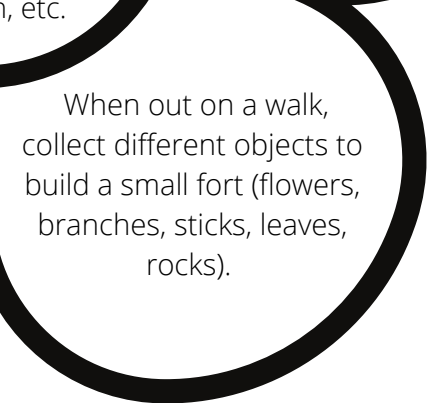

Have fun with water balloons: paint with them, play bowling, throw them towards a target, hot potato, obstacle course holding a balloon, etc.

Try out a new recipe with your child. You can practice following directions with them. Talk about the textures, the tastes and the smells you experience!

Have a treasure hunt outside! Find something big, small, soft, bumpy, etc.

When out on a walk, collect different objects to build a small fort (flowers, branches, sticks, leaves, rocks).

For more free activities, take a look at our program:

L'interconnexion  
Familiale
